Dear Mark

Thank you for introducing the Healcerion Wireless Liner Sonon Portable Ultrasound at the OMED 18 medical conference back in October of 2018. This Wifi handheld ultrasound has changed the way I practice in my office. It has become one of the most valuable diagnostic tool for me and my patients. Dealing with neuromusculoskeletal injuries, this medical device is the closest comparison to the Star Trek's "tricorder".

The resolution from this ultrasound is amazing and it is easy to use. It not only save me time by not sending out patients to radiology and have to wait for the result, this device enables me to diagnosis and treat my patients right away. This is a device that every physician should have!

Sincerely,

---

Eric I-Hung Lin, D.O.
